32 oz. Pouch
Washes **48** Loads

Dispenser

Dish Wash Automatic Concentrate ☆

There are some things you'll never have to do again. Like wash a dish before you put it in the dishwasher. Use earth-adverse chemicals to get a dish clean. Or fill up that little detergent cup to overflowing. Get Clean Dish Wash Automatic Concentrate is a patented little pouch for nope, don't have to.

Benefits

- The deep, enzyme-activated cleaning power gently removes tough stains, leaving dishes and glasses sparkling clean.
- Superconcentrated – cleans 48 loads – just 2 teaspoons in each dispenser cup.
- No pre-rinsing needed – Removes dried on food and tough stains, so they don't get stuck on.
- Dissolves quickly and completely, getting to work straight away.
- Absolutely no chlorine and no fragrances, which can pollute the air that you breathe.
- Comes in handy resealable pouch with measuring scoop

Did you know?

Some products contain dry chlorine that is activated when it encounters water in the dishwasher. Chlorine fumes are released in the steam that leaks out of the dishwasher, and they can cause eye irritation. Many automatic dishwashing detergents may also contain phosphates. Phosphates cause rivers and lakes to become clogged with masses of algae and weeds, robbing less aggressive plant and aquatic animal life of oxygen, ultimately resulting in lifeless streams and rivers.

Get Clean™ Dish Wash Automatic Concentrate does not contain these or other hazardous ingredients and is a patented, phosphate-free formula.

Shaklee Difference

SAFE

- ✓ Fragrance free
- ✓ No toxic fumes
- ✓ No hazardous chemicals

POWERFUL

- ✓ Superconcentrated – cleans 48 loads
- ✓ Enzyme-activated formula – removes tough stains
- ✓ No pre-rinsing needed

GREEN

- ✓ Natural – enzyme and mineral-based ingredients
- ✓ Biodegradable
- ✓ No phosphates – patented formula
- ✓ No dyes
- ✓ Safe for septic tanks

Dish Wash

Automatic Concentrate

Directions for best results

Save water and energy and use the dishwasher only when it's full. Use hot water (at least 140° F) to get things sparkling. Dirty surfaces should face spray jets. Don't block spray to top and back.

in normal water conditions

1 scoop (2 tsp.) to each dispenser cup.
Note: In hard water add 2 scoops (4 tsp.) per dispenser cup. For really hard water, go ahead and fill them up.

NO MORE PRE-RINSING Get Clean Dish Wash dissolves really fast and releases active cleaning agents early in the wash cycle. You might need to soak baked-on food.

CONCENTRATED Use just 1 scoop (2 tsp.) in each dispenser cup, unless dishes are super dirty. Other brands need 16 tsp. (2 full dispenser cups) for the same clean. Safe for use in septic systems.

Close securely after use. Store in cool, dry place.

For ease of use, purchase a Dish Wash Automatic Concentrate Dispenser.
