Did you know?

Chlorine is the chemical most frequently involved in household poisonings and is a potent environmental pollutant. Chlorine is a part of a class of chemical compounds that may cause reproductive, endocrine, and immune system disorders. Chlorine should never be mixed with ammonia. This mixture can generate toxic chloramine gas. Products that contain ammonia include some all-purpose and bathroom cleaners, dishwashing detergents, and metal polishes. Chlorine also degrades natural and synthetic fibers.

Get Clean products do not contain chlorine or other hazardous ingredients.

Laundry Booster and
Stain Remover

Directions for best results

Dissolve in warm water and use within six hours. Don't let Nature Bright® touch wet fabric. Check fabric label instructions. To test for colorfastness (especially nylon, acetate, silk or washable wool) apply a solution of 1/2 teaspoon Nature Bright dissolved in 2 cups hot (not boiling water) to a hidden area. If color doesn't bleed or fade, proceed with use.
